Enterprise Information Resources Announces EIR CompTools, Smart Data Staging for the SuccessFactors® Compensation Solution

The Venetian/Palazzo Resort & Casino - Las Vegas, NV - August 10-12, 2015

Enterprise Information Resources Inc. (EIR™) today announced the availability of EIR CompTools™ advanced data-preparation software tools. The offering leverages the rich features of the SuccessFactors® Compensation solution from SuccessFactors, an SAP company

EIR CompTools provide smart staging and transformation of compensation data. The new cloud-based tools automate common data-preparation challenges including consolidation of compensation data from multiple sources, detection and correction of data errors, and capture of manual exceptions.

The tools also automate the transfer of compensation data between templates, accumulation of history for bonus calculations and generation of a compensation user-data file, and variable-pay employee history file. The data is staged on the SuccessFactors Compensation solution, providing a secure self-service platform.

The tool is ideal for organizations facing data consolidation and data quality problems or those lacking internal resources for creating compensation and variable-pay interface files that can leverage all the features of the system.

"Without clean, accurate data, organizations can't take full advantage of the advanced or the standard features of their compensation software," said France Lampron, president of Enterprise Information Resources Inc. "Our goal is always the complete success of our customers, and our new tools are an important part of our total solution work."

For more information, visit Enterprise Information Resources Inc. in booth #1613A at the SAPPHIRE® NOW conference being held May 5-7 in Orlando. SAPPHIRE NOW and the ASUG Annual Conference are the world's premier business technology event and the largest SAP customer-run conference, offering attendees the opportunity to learn and network with customers, SAP executives, partners and experts across the entire SAP ecosystem.
