Our organization is very complex and EIR, by way of SuccessFactors, helps us manage 22 variable pay short-term incentive plan calculations. Each year we have a number of changes that directly require configuration changes in which EIR assists us in recoding SuccessFactors to calculate correctly in a fast and efficient manner. Our project lead diligently reviews our plan changes, understands them, and then works on implementing these changes in a seamless manner.

Raytheon

EIR has been a good partner to Raytheon. We are also leveraging some of their add-on applications due to deficiencies in the SAP product design. We continue to work through product gaps and create integrations with EIR, where possible.

All of the standard business challenges were met including configuration of the forms, complex workflows and detailed reports. EIR developed a HANA based process that detects changes in specific data fields from our nightly uploads, which is something not even SuccessFactors has been able to accomplish.
